

**ARCH**  
**SOLUTIONS**

SUSTAINABLE , MODERN , DURABLE , GREEN  
SOLUTIONS

[www.arch-solutions.net](http://www.arch-solutions.net)

Since  
**1985**

Founded In 1985 By Professor Ayman Ashour, An Architecture Professor At Ain Shams University

**Archplan Group** Has Expanded Through Partnerships With Experts From Various Countries To Develop Large-Scale Projects. The Group Now Has Branches In Egypt, England, Oman, Uae, And Morocco

**Archplan Group** Focuses On Sustainable Architectural Projects, .Working To Create Smart, Green, And Sustainable Landmarks

Our  
**Goal**

is to provide creative, sustainable architecture, landscape, and technology solutions for construction materials either interior or exterior. We are highly experienced in the field of sustainable architecture and have built strong partnerships with innovative materials manufacturers allowing us to offer unique solutions & services at cost-effective prices.

## Our Services

SUSTAINABLE , MODERN , DURABLE , GREEN  
SOLUTIONS

### Supply of Sustainable Processed Natural Materials

Supplies eco-friendly raw materials that reduce waste and environmental impact.

### Maintenance and Regular Monitoring of Existing Projects

Implements preventive maintenance and monitors environmental performance for long-term project efficiency.

### Providing Technical Assistance and Detailed Designs

Delivers expert guidance and tailored green building strategies for sustainable design.

### Importing and Exporting Products from Global Brands

Distributes sustainable products internationally, ensuring compliance with trade and logistics standards.

### supervision, quality preview, and after-sales services

Oversees project execution, ensures quality standards, and provides post-project support and maintenance.

### Project Evaluation and Management for Sustainability Transformation

Evaluates existing projects and recommends renewable technology improvements to lower environmental impact.

### Implementing Innovative Engineering Solutions

Offers design and engineering services for sustainable indoor and outdoor spaces.

# Paving

Durable And Aesthetic Materials For Covering  
Outdoor Surfaces, Such As Sidewalks And Pathways

# Lighting Elemets

Outdoor Lighting Installations Providing  
Both General And Decorative Illumination  
With Energy Efficiency In Mind.

Road  
Lighting

Landscape  
Lighting

Bollard

Uplight

Facade  
Light

Lighting For  
Factories &  
Warehouses

Processed  
& Folding  
Light

Administrative  
Building  
Lighting

Indoor &  
Outdoor  
Lighting

# Artificial Grasses

Synthetic turf as a maintenance-free alternative to natural grass, maintaining a vibrant appearance year-round

# Modern Technological Systems

Integrating Cutting-Edge Digital Tools and Smart  
Infrastructure to Meet the Evolving Demands of  
Modern Projects and Environments

Facade Finishes

Irrigation & Green Roofs  
Systems

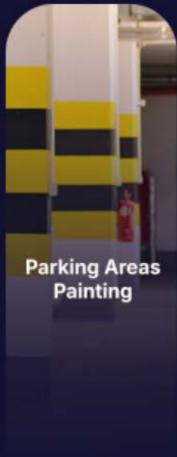

Solar Panels Systems

Water Drainage Systems

# Industrial Work & Road Accessories

Specialized Setups For Road Planning And Playing Areas,  
Along With Accessories Like Traffic Signs And Barriers To  
Ensure Safety And Sustainability.

# Ahmed Ashour

MSC Architect

"Sustainable architectural solutions have become essential today as concerns about climate change grow.

Engineers are now focused on creating eco-friendly, energy-efficient buildings. Sustainable architecture relies on renewable energy sources, like solar panels, to reduce environmental impact and improve residents quality of life.

At Archplan Group, we focus on developing sustainable architectural landmarks using unconventional materials to address architectural challenges.

Arch Solutions, the latest addition to the group, offers efficient and sustainable solutions for both interior and exterior construction, aiming to revolutionize the market with these solutions."
